

Stainless steel cylinders

FESTO

- Corrosion-resistant in harsh ambient conditions
- Easy-to-clean design
- Wide choice of variants
- Comprehensive range of accessories

Stainless steel cylinders

Key features

FESTO

Their applications

Reliable components need to achieve 100% operational reliability, even in harsh operating conditions. The aim is to maximise availability of machinery while minimising downtimes. Stainless steel cylinders are therefore used in applications where the surface finish of normal pneumatic drives would render them non-resistant to the surrounding media. However, designing a corrosion-resistant system involves more than simply selecting a suitable steel – it also requires the selection of a tailored concept for mounting components and accessories.

Their strengths

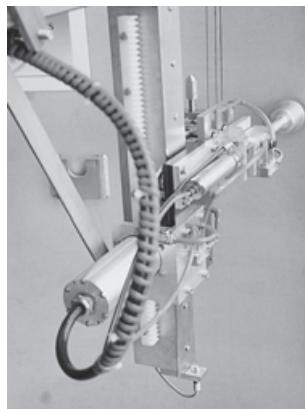

Festo's stainless steel cylinders are made from highly resistant materials such as 1.4301 and 1.4401. These popular high-alloy, stainless austenitic chrome/nickel and chrome/nickel/molybdenum steels protect against chemical or electrochemical stress as well as damage to the material surface caused by cleaning or detergents. These groups of materials are particularly resistant to uniform surface corrosion and offer increased protection against pitting and crevice corrosion.

Their advantages

Festo's worldwide service network ensures optimum availability of stainless steel cylinders. As well as a comprehensive range of standard cylinders to DIN ISO 6431 and 6432, we also offer a range of tailored mounting components and accessories. The stainless steel cylinders are assembled with USDA-H1 lubricating grease and wiper seals in accordance with BGVV (Federal Institute for Risk Assessment) guidelines. This means that they are suitable for use in the food industry and for direct contact with food products. We will be pleased to answer any inquiries you may have about future additions to our stainless steel range. Just give us a call.

Good to know

Our many years of experience in the area of stainless steel can be invaluable when you are investigating solutions for harsh environments. Our experts can answer any questions you might have about surface finishes and chemical resistance.

The atmosphere in the curing cellar of a cheese factory consists of an unpleasant mix of ammonia, lactic acid and 98% humidity.

An area subject to radiation of up to 4 sievert/h whilst immersed in fully desalinated water in a manipulator for dismantling nuclear reactor pressure reservoirs and thermal shields.

Stainless steel cylinders

FESTO

Key features

Resistance

Complete resistance to pitting and crevice corrosion is not always possible, even with ideal application parameters. The following parameters increase the pitting effect of chloride ions:

- Concentration of chloride ions
- Duration of contact
- Temperature
- Decreasing ph value

It must therefore be ensured during design, assembly and operation that all parts of the machinery can be properly cleaned to avoid an accumulation of chloride ions.

Selected sealing materials ensure very high resistance to a wide range of chemical compounds. Further information on resistance to media can be obtained on the Internet at www.festo.com.

In principle, we recommend that the cylinder be cleaned with the piston rod in the retracted position to avoid the risk of washing out the lifetime lubrication.

Various types of machinery contamination make cleaning processes necessary in many industrial sectors. The degree of cleaning required ranges from wiping the machinery to wet cleaning to foam cleaning with different exposure times and concentrations.

It is therefore impossible to make a general recommendation on compatibility.

Note

The bearing cap on stock products is made of one piece.

The bearing cap is made of two pieces when ordered using the modular product system. This means that the wiper seal can be replaced if repairs are required.

Standard cylinders CRDSNU to ISO 6432, stainless steel

Round cylinders CRDSNU, stainless steel

Key features

FESTO

Variants

| | | | |
|---------|-----------------------------|----------------------------------|--|
| CRDSNU: | CRDSNU-S2: Basic version | CRDSNU-MQ: Through piston rod | CRDSNU-MG: Short end cap without swivel mounting |
| | | | Bearing cap without mounting thread |

Additional variants

| Symbol | Key features | Description |
|--------|------------------------------------|---|
| | S2 Through piston rod | For working at both ends with the same force in the forward and return stroke, for attaching external stops |
| | S6 Heat-resistant seals | Temperature resistance up to max. 120 °C |
| | K2 Extended male piston rod thread | – |
| | K3 Female piston rod thread | – |
| | K5 Special piston rod thread | Metric standard thread to ISO |
| | K8 Extended piston rod | – |
| | A1 Wiper seal variant | Increased chemical resistance |
| | A2 Wiper seal variant | Hard wiper seal: Cylinder with hard wiper seal |
| | A3 Wiper seal variant | Unlubricated operation: Cleaning processes degrease the piston rod. A special piston rod seal permits a longer service life compared to the standard seal. |
| | TT Low temperature | Temperature resistance down to max. -40 °C |

Cushioning types

Operating conditions

| | |
|--|--|
| Operating medium | Compressed air in accordance with ISO 8573-1:2010 [7:4:4] |
| Note on operating/pilot medium | Operation with lubricated medium possible (in which case lubricated operation will always be required) |
| Operating pressure ¹⁾ [bar] | 1 ... 10 |
| Food-safe ²⁾ | See supplementary material information |

- 1) An increase in the minimum operating pressure is possible with variants
 2) Additional information www.festo.com/sp → Certificates.

Ambient conditions

| | | | | |
|--|---------------|-----------|------------|-------------|
| Standard cylinder | Basic version | A1 | S6 | TT |
| Ambient temperature ¹⁾ [°C] | -20 ... +80 | 0 ... +80 | 0 ... +120 | -40 ... +80 |
| Corrosion resistance class CRC ²⁾ | 3 | | | |

- 1) Note operating range of proximity sensors
 2) Corrosion resistance class CRC 3 to Festo standard FN 940070
 High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional requirements for the surface and which are in direct contact with a normal industrial environment.

ATEX¹⁾

| | |
|---|---|
| ATEX category for gas | II 2G |
| Explosion ignition protection type for gas | c T4 |
| ATEX category for dust | II 2D |
| Explosion ignition protection type for dust | c 120°C |
| Explosion-proof ambient temperature | -20°C ≤ Ta ≤ +60°C |
| CE marking (see declaration of conformity) | To EU Explosion Protection Directive (ATEX) |

- 1) Note the ATEX certification of the accessories.

Round cylinders CRHD, stainless steel

FESTO

Type codes

CRHD - 50 - 80 - PPV - A - MQ - S6

Type

Double-acting
CRHD Round cylinder

Piston Ø [mm]

Stroke [mm]

Cushioning

PPV Pneumatic cushioning, adjustable at both ends

Position sensing

A Via proximity sensor

Cover variant

MQ Bearing cap with male thread
MC End cap with clevis
MS End cap with lug

Variant

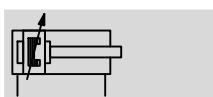

S6 Heat-resistant up to 120 °C

Round cylinders CRHD, stainless steel

Technical data

| Mounting position | Any | | | | | |

Operating and environmental conditions

| Variant | CRHD | S6 |
|--|--|----|
| Operating medium | Compressed air in accordance with ISO 8573-1:2010 [7:4:4] | |
| Note on operating/pilot medium | Operation with lubricated medium possible (in which case lubricated operation will always be required) | |
| Operating pressure | 1 ... 10 bar | |
| Ambient temperature ¹⁾ [°C] | -20 ... +80 | |
| Food-safe ²⁾ | See supplementary material information | |
| Corrosion resistance class CRC ³⁾ | 3 | |

1) Note operating range of proximity sensors

2) Additional information www.festo.com/sp ➔ Certificates.

3) Corrosion resistance class CRC 3 to Festo standard FN 940070

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional requirements for the surface and which are in direct contact with a normal industrial environment.

Force [N]

| Piston Ø | 32 | 40 | 50 | 63 | 80 | 100 |
|--|-----|-----|------|------|------|------|

1) Corrosion resistance class CRC 4 to Festo standard FN 940070

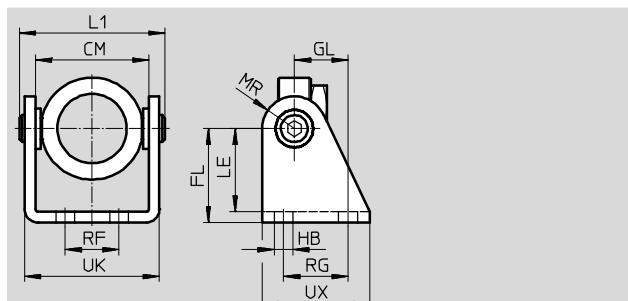

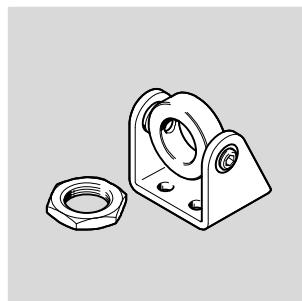

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, for instance in the chemical or food industries. These applications may need to be supported by special tests (→ also FN 940082) using appropriate media.

Accessories for stainless steel cylinders

Technical data

FESTO

Clevis foot CRLMC

Material:

High-alloy steel

Free of copper and PTFE
